

Table A. Timing of the last seizure in relationship to the patient clinic visit.

Timing of last seizure of the type	Generalized Convulsive Seizures (n = 849)	Other Motor Seizures (n = 848)	Non-Motor Seizures (n = 849)
In the last week	5.3%	9.8%	5.9%
In the last 3 months	11.5%	9.7%	5.5%
Three months to a year	12.2%	7.5%	3.7%
More than a year	24.3%	11.9%	6.1%
Never this type	25.0%	39.6%	52.2%
Uncertain	12.7%	7.9%	13.4%
Missing data	9.0%	13.6%	13.2%

Table B. Frequency of specified seizure type at the time of the patient clinic visit.

Frequency of seizures	Generalized Convulsive Seizures (n = 847)	Other Motor Seizures (n = 845)	Non-Motor Seizures (n = 847)
Daily	1.3%	4.0%	2.5%
Monthly - 3 to 12 seizures	6.4%	7.2%	4.3%
Up to 10 seizures/year	7.6%	6.2%	2.2%
Less than 1 seizure/year	15.5%	8.8%	3.0%
Uncertain	20.3%	13.6%	14.2%
No seizures of this type	23.0%	36.8%	48.3%
Missing data	26.0%	23.4%	25.6%
